Description:

Nestabilities de Spellbinders is extraordinary tools of cut, they revolutionize the market of the tools of cut(cutting).

ø 4 - 10 cms, 6 rooms(parts,plays) Their functions are multiple: they cut, emboss, serve as stencil ... They suit with the majority of the machines of cut with pressure or movement available on the market (in particular Cuttlebug, Sizzix, Spellbinder, Grand Calibur, the Double Do XL). They cut essentially the paper but also the fine materials (light fabric(tissue), fine cork, lightweight felt) Every set of cuts is sold with 3 to 7 elements of matched size(cutting), the sets of the same shape (big and small size(cutting), scalloped and straight(right) cut(cutting)) harmonize between them. Of simple use, very fine thus very light (facilitate the arrangement), solids (consisted only of metal without added room(part,play)) and almost indestructible (possible extensive use), proposing classic, elegant and timeless forms, all these qualities justify
